

...the fastest and most affordable way to RoHS compliance

China RoHS Gold and Silver Packages: The Fastest, Simplest and Most Affordable Way to China RoHS Compliance

-FOR IMMEDIATE RELEASE-

Colorado Springs, CO – November 2, 2006: On March 1, 2007 - less than 4 months from now - China RoHS' labeling and disclosure requirements for more than 1800 products will take effect. At a time when many companies are concerned about what they need to do and how they will protect their revenue, the GoodBye Chain Group (GCG) announces its one-stop shopping solution for complying with China RoHS and its implementing standards.

"How do I determine the Environmentally Friendly Use Period?" "Where do I find the logo specs?" "What level of detail do I need for my products in the China RoHS Disclosure Table?" "How do I generate the Table in Chinese?" GCG solves these problems and many others with the industry's most comprehensive package for China RoHS compliance.

Designed to provide very high value at a very affordable price, GCG's China RoHS Gold Package contains all the key China RoHS documents, including an explanatory version of the China RoHS Directive; the various Marking, Environmentally Friendly Use Period, and other implementing standards; and an extensive and growing database of requirement details in an easily-understood FAQ format.

GCG's China RoHS Gold Package also contains real-time, web-based consulting; weekly updates; a check-list of To-Do items; and a prompt question/answer response service – all of which are critically important when the timeline is so short and the stakes are so high.

Most uniquely, the China RoHS Gold Package contains GCG's Material Declaration Wizard (MDW) database software. GCG's low cost MDW software tool can be used to quickly generate China RoHS Disclosure Tables in required Chinese as well as in optional English. MDW can also be used for collecting, managing, and reporting EU RoHS substance data, utilizing MDW's fully-functional XML capacity for IPC 1752 reporting.

"We have assisted suppliers, contract manufacturers, and large finished goods manufacturers for nearly 4 years," said Harvey Stone, Managing Director of the GoodBye Chain Group. "The China RoHS Gold Package provides the most value at the best price and in the shortest timeframe of all our past offerings. We've worked very hard to make compliance with China RoHS very doable rather than very difficult. That's what customers want. That's what the China RoHS Gold Package delivers."

GCG also offers its China RoHS Silver Package. For companies with up-and-running database software that can collect, manage, and report RoHS-related data, the China RoHS Silver Package provides all of the China RoHS Gold Package services, but does not include GCG's MDW database software.

About The GoodBye Chain Group

Originally focused on assisting companies to turn their waste streams into revenue streams, The GoodBye Chain Group (GCG) has specialized in RoHS and WEEE consulting for nearly four years. GCG works primarily with SMEs, although it has multi-billion dollar customers who equally rely on GCG's breadth of industry knowledge and depth of compliance experience. GCG consultants have served on the IPC 1752 Working Group and the iNEMI Material Declaration Working Group. They have also provided RoHS trainings in China, Australia, and Mexico, as well as in the US. GCG was the only US-based company invited to attend and speak at an EU stakeholder meeting on the Integrated Product Policy. GCG also provides audits, consulting, and training for WEEE, EuP, Design for Environment, ISO 14001, and RoHS Compliance Assurance Systems (CAS).
