

Get Homogeneous material part level information

PPM Data at the Homogeneous Material Level...when you don't have the bandwidth,time;or stomach for collecting data

PPM data at the homogenous material level is the Holy Grail. But collecting it from suppliers is "caveman compliance". We know. We've done it for GCG customers. Today, you can get ppm data at the homogenous material level quickly and affordably.

GCG can provide your company with ppm data at the homogenous material level. We have access to over 3500 electronic component suppliers. As a result, you can be done - or close to it - with GCG's simple 3-step process: 1. Purchase data on your BoM's compliant parts, as well alternatives to non-compliant parts 2. Manage the data using GCG's MDW-ES Software 3. Publish your customer-ready IPC 1752 Declaration or other formats on your website Your TCD - total cost of data-gathering will drop. So will your stress. What will drop the most, however, is your risk. Key Questions: - Are you using "caveman compliance" to collect ppm data at the homogenous level - or might you in the future? - If "yes", what results are you getting? - What impact would it have if you could diminish greatly your RoHS activities and channel all that time and expertise into your core business?
