

Global RoHS

Global RoHS Solutions because "Hazardous Substance Restriction" Directives are just about everywhere your customers are

Global RoHS

EU;China;California;Japan;Korea;Norway;South America;Australia/New Zealand;others on the way. And, naturally, there are differences in the number of substances, product scope, compliance basis, information disclosure and other requirements. GCG's Deep Domain Expertise and "Roll-Up-Our-Sleeves" Approach

No company ever wants their access to markets, customers and revenue interrupted. GCG can assist you in RoHS-proofing your company against governmental product bans and/or customer-terminated contracts

For the last 7 years, we have pioneered RoHS compliance with our:

- Award-winning MDW-ES Substance and Material Management Solution
 - Deep domain expertise with companies at all supply chain levels in the high-tech, medical, semi-conductor equipment, consumer and other industry sub-sectors
 - Managed Services approach that provides "one-stop" compliance via our:
 - o Portfolio of software products and consulting skills
 - o Data collection services
 - o Project plans and other documents that can be easily customized for your company
 - o Third-party "Compliance Alliance" partners like Underwriter Labs and ThermoFisher Scientific that provide lab testing, XRF screening devices and other RoHS-related products and services
- GCG knows both the RoHS-like Directives and how to help your company reduce its risk, costs and stress. We have been awarded SMT Magazine's Vision Award for our MDW-ES Substance Management Software Solution; provided RoHS trainings in China, Australia and North America, including eight trainings for the Surface Mount Technology Association; had two representatives on the IPC 1752 Working Committee; and a great deal more. Key Questions:
- Do you have a solution for cleansing, analyzing, status-checking and audit-proofing your RoHS-related substance and material information at the ppm level?
 - What is your strategy for collecting full-disclosure substance data from the 3 main sources of that data?
 - Do you have a project plan for globally complying with RoHS rather than on a country-by-country basis?
- GCG's Global RoHS Experience:
- Geographic Case Study Summaries
 - Electronics Manufacturing Services (EMS) Case Study
 - CHINA RoHS
